

# SHARAD AADE | .NET Developer

Email: aadesharad@gmail.com | Phone: +91-7218002575

GitHub: github.com/sharadaade | LinkedIn: linkedin.com/in/sharadaade

## SUMMARY

.NET developer with hands-on training in ASP.NET Core MVC, Web API, and Entity Framework Core, currently pursuing Full Stack development at NareshIT. Built and published a VS Code theme extension with 100+ installs and authored 10 technical .NET articles reaching 1200+ views on dev.to. Skilled in C#, SQL Server, clean architecture, and RESTful API development — seeking a junior .NET developer role to contribute to real-world backend systems.

## TECHNICAL SKILLS

- **.NET Technologies:** ASP.NET, ASP.NET Core, ASP.NET Web API, Entity Framework Core, LINQ
- **Languages:** C, C#, JavaScript, TypeScript, SQL
- **Frontend:** HTML, CSS, Bootstrap, Tailwind CSS, jQuery, Angular
- **Database:** SQL Server, ADO.NET
- **Architecture & Design Patterns:** MVC Architecture, Repository Pattern
- **Tools:** Git, GitHub, Visual Studio, VS Code, Swagger

## SOFT SKILLS

- Communication, Problem solving, Logical thinking, Team collaboration

## PROJECTS

### Employee Management System

- Developed a full-stack Employee Management System with structured and scalable architecture
- Implemented Repository Pattern and separation of concerns for maintainable and reusable data access logic
- Implemented CRUD operations for Employee and Department modules using LINQ and efficient data handling
- Designed and managed relational database with proper schema, relationships, and constraints
- Used asynchronous programming (async/await) to improve performance and responsiveness
- Built responsive UI with validation and error handling for better user experience

### Task Tracker System | ASP.NET Core MVC + SQL Server

- Developed a Task Tracker System using ASP.NET Core MVC, C#, and SQL Server
- Implemented CRUD operations for task management using Entity Framework Core and LINQ
- Added task status, due date, and priority features for better task organization
- Built responsive user interface using HTML5, CSS3, Bootstrap, and JavaScript
- Implemented form validation and error handling for improved user experience
- Designed and managed relational database tables with proper relationships and constraints

### AutumnHQ - VS Code Theme Extension | Marketplace: <https://marketplace.visualstudio.com/items?itemName=AutumnHQ.autumnhq>

- Developed a custom VS Code theme extension using JSON and Yeoman scaffolding
- Published on VS Code Marketplace with 150+ installs

## HANDS-ON-EXPERIENCE

### .NET Full Stack Trainee - NareshIT

2025 – Present

- Built 3+ ASP.NET Core MVC applications with CRUD functionality using Entity Framework Core and SQL Server, improving development efficiency by 30%.
- Developing RESTful Web APIs using ASP.NET Core with CRUD operations, Swagger/OpenAPI testing, and SQL Server integration
- Working with Git, Visual Studio, and GitHub in a structured full-stack curriculum

## EDUCATION

### MCA, Shri Swami Samarth Institute, Ahilyanagar

2023 – 2025

CGPA - 7.19

### BCA, New Arts, Commerce and Science College, Ahilyanagar

2020 – 2023

CGPA - 7.97

## CERTIFICATION

- Foundational C# with Microsoft – freeCodeCamp (Nov 2023)
- ASP.NET Core MVC – Udemy (Expected - Jul 2026)

## LANGUAGES

- English
- Hindi
- Marathi
